

Hosted IP Voice

- Cut Costs and Improve Cash Flow
- Eliminate Obsolescence
- Effortless Moves, Adds and Changes
- Powerful Security, Quality and Reliability Built Right into the Network
- Simplify Relationships, Equipment, Providers and Process
- Get Broadband Internet and Telephone with One Connection

Moving to USA Datanet's Hosted IP Voice does away with your need to purchase, install, and maintain a premise-based phone system. You dramatically reduce up-front capital expenditures, eliminate recurring maintenance charges, and lower overall monthly costs—all while taking advantage of state-of-the-art features and protecting your company against obsolescence.

Unmatched Savings:

USA Datanet's Hosted IP Voice is designed for cost savings every step of the way:

- Drastically reduce or eliminate capital investment, both current and future, in equipment like key systems, cards, gateways, power supply systems.
- Eliminates costly maintenance contracts with multiple vendors involved in moves, adds, and changes.
- Bundled monthly pricing includes: local calling, regional and domestic US and Canadian long distance calling, and toll-free calling.
- One contact, one contract, one connection—meets all your communications needs.
- Scales to meet company growth needs—no penalty for growth at a single location, or for expansion to several locations.
- Telecommuters linking in via broadband utilize the corporate phone, avoiding reimbursement for costly phone calls.

Is it for you?

- Planning to replace your current phone system?
- Expect to grow, move, expand, or add locations?
- Want to eliminate high vendor maintenance fees by managing your own moves, adds and changes with an easy web interface?
- Want up-to-date functionality and to avoid replacement costs?
- Like the predictability of a fixed-cost, unlimited usage plan?
- Prefer not to purchase and/or maintain a phone system?
- Want to simplify vendor management?
- Need the flexibility of on-the-fly transfer of calls to mobile or home office phones?

Conferencing Service

Carrier-grade security

State-of-the-art IP phones

How it works

Utilizing high-speed IP (Internet Protocol) connections, the service allows the main telephone equipment to be located at USA Datanet's secure, central location, replacing your existing phone system. You get a complete telephony solution: including secure, reliable, high-speed, point-to-point connectivity with a dedicated, managed T1 circuit (or equivalent connection method). Voice calls travel over a dedicated IP connection and never over the public Internet, allowing USA Datanet to manage Quality of Service.

Installation includes all on-premise equipment required, including state-of-the-art IP telephones for employee desktops, and is installed by trained USA Datanet technicians, reducing any potential problems and issues. Once you're up and running, USA Datanet backs up its service with worry-free customer support.

Easy to use

You can make changes to your phone system on an as-needed basis, without incurring any expense or wait required when dealing with outside vendors.

The intuitive, easy-to-use web interface can be managed efficiently by administrative staff, 24 hours a day.

Simplify and save

Now, USA Datanet enables small and mid-sized businesses to leverage advanced IP technology for a total communications solution, reducing or eliminating capital expenditures, generating monthly savings, and delivering unmatched features and functionality. With it, you will see an immediate impact on your business:

- Total Cost of Ownership is reduced—with a clear ROI.
- Bottom line savings begin immediately with predictable bundled pricing.
- On-demand web tools that enable you to manage your phone system—whenever you need to.
- Robust broadband access helps you take full advantage of the power of the Internet.

With USA Datanet, you gain a trusted partner with a powerful technology platform that will grow with your business. Call or e-mail us to save money for your business.
