

USA Datanet's SIP Trunking allows businesses to consolidate their voice infrastructure and control costs by replacing expensive TDM trunks with cost-efficient SIP trunks. Our SIP Trunking solution reduces telephony costs, consolidates CapEx spending and provides rich, SIP -based voice services. With SIP trunking you can simplify your internal network, reduce cost and easily enhance your businesses' communications.

WHAT IS SIP TRUNKING?

- SIP (Session Initiated Protocol) Trunking blends both voice and data over a single broadband connection. SIP Trunking offers significant cost savings by eliminating the need for PSTN (Public Switched Telephone Network) gateways and ISDN BRI or PRI lines streamlining your connection and saving you money.
- USA Datanet's SIP Trunking is compatible with legacy phone systems as well as new SIP based hardware. USA Datanet can seamlessly connect your system to our platform to deliver rich and powerful communications services.
