

MozyPro Online Backup for Businesses

Affordable, easy-to-use backup for multi-user and server environments

Online backup made simple

As a business professional, you know the importance of keeping your company data, financial records, and administrative materials safe. You don't have time for backup solutions that take months to set up, require thousands of dollars in hardware costs, and force you to hire someone to oversee it all.

Mozy, the trusted leader in online backup, saves you time and money with simple, secure, and affordable backup solutions for computers and servers. You can be up and running in no time, as Mozy gives you the flexibility to deploy and manage multi-user environments from the convenience of a single administrative console.

With MozyPro, you'll get the tools to take control

MozyPro's web-based Administrative Console allows you to:

- Create sub-administrators
- View account usage, history, & stats
- Generate & email reports automatically
- Reset account passwords
- Change account status
- View and distribute license keys
- Customize configuration settings

Through the MozyPro software, application users can:

- Select folders and files to back up
- Set automatic and scheduled backups
- See a history of all backups
- Change account status
- Configure options & bandwidth throttling
- Restore files and folders

The MozyPro advantage

Simple

Manage multi-user and server environments from the convenience of a web-based administrative console.

Secure

Mozy employs the highest security standards and stores your data in world-class data centers.

Affordable

Secure backup solutions start at less than \$5 per month, with no setup fees, no hardware to purchase, and little management required.

Professional support

MozyPro support technicians are available 24/7/365 via phone and chat. You also have access to our Support Portal, complete with a customer community, knowledge base, and training information.

MozyPro feature set

Secure

- **Encryption:** All user data is encrypted locally with military-grade encryption prior to transfer via a 128-bit SSL connection. Users can choose a managed encryption key or a personal key for added security.
- **Data centers:** All data centers employ state-of-the-art security, meet SAS70 standards, are ISO 27001 certified, and where applicable, adhere to European Union Safe Harbor Privacy Principles.
- **Near continuous data protection:** Mozy automatically detects and backs up new and changed files.
- **Reports:** Administrators may set up and run reports regarding the backup health of their account that will be sent automatically to their email address on a daily, weekly, or monthly basis.

Easy to use

- **Automatic or scheduled backups:** Tell MozyPro when to perform your backups. Automatic is the simplest method in which backups are performed while your computer is not in use. Scheduled backups can be performed daily or weekly at a specified time of day.
- **Block-level incremental backups:** After the initial backup, Mozy only backs up new or changed portions of files, which saves bandwidth and ensures future backups are lightning fast.
- **Bandwidth throttling:** Users can determine how much bandwidth they want to dedicate to their backups so other high-priority services can run unimpeded.
- **Multiple restore options:** Users and administrators can restore data via the Mozy software client, through the web, or by ordering a DVD restore. Windows users can also restore data via right-click or through the Mozy Virtual Drive.
- **Local backup with Mozy 2xProtect™:** Windows users can now back up locally to an external device as well as online to Mozy data centers for double protection.
- **Improved for Mac:** Mozy 2.0 for Mac offers a clean new interface with simple-to-use backup and restore, better file scanning, and a smoother configuration experience.

Platform and file support

- **Version (snapshot) support:** Restore file versions up to 30 days in the past.
- **SQL, Exchange, and network drive support:** Mozy backs up common business applications running on Windows servers.
- **Windows and Mac support:** MozyPro supports Windows 7, 2008, Vista, XP, 2003, & 2000 (including servers) and Mac OS X 10.6, 10.5, & 10.4 (including servers).
- **Open and locked file support:** MozyPro backs up all open and locked files, including Outlook PST files.
